

ASUS Dark Knight Router

It's the router Gotham deserves AND the one it needs right now

“Good evening, Mr. Wayne. If you're here for the new suit, I'm afraid it won't be ready for another few weeks or so.”

“That's not why I'm here, Lucius. The batcomputer won't connect to the internet. I need your expertise.”

“Have you tried turning it off and then back on?”

“Very funny, Lucius. That's exactly what Alfred said.”

“Well, there's always the newer, more advanced Wi-Fi router that I've been working on. This sort of tech is usually a bit below the company's paygrade, but what we have here is still better than anything else you'll find.”

“What do you call it?”

“Oh, it has a long and uninteresting Wayne Enterprises designation. I just took to calling it the Dark Knight. And yes, Mr. Wayne, it does come in black. In fact, that's the only color it comes in.”
